## Man Smothered to Death South of Cereal

### Breezelets

Dr. Blow, M.P.P., is mentioned as a probable successor to Lieut. Governor Bulyear.

The wind seemed to Blow that way once

But it looks as though Dr. R. G. Brett of Banff has given this rumor a knock-out Blow and got one over the Calgary Doctor by landing the coverted honor.

It is said now that the kaiser intends to rush reinforcements across the Balkans to assist her Turkey ally.

A sort of Turkey-trot movement, as it were.

Finishing up on the other side of the Balkans in a real old fashioned British bunny-hug and a Russian bear-grip three-step home-ward "shot-ease"

We rise to remark that the ankle watch must be the wrist watch run down.

As a halter the Czar did not seem much of a success. But perhaps his wasn't a check-reign.

When enlistment lags in England, along comes a Zeppelin raid. Recruiting is brisk.

All indications point to the fact that Kitchener's promised drive is on in real earnest. There will be no standstill—either the Germans or the Allies will have to give away.

And it isn't the Allies—but the other fellows. The Hun is on the run, that is, as many as can get away.

During this great drive the kaiser hasn't had time to acknowledge thanks to the Almighty.

Two or three weeks ago the German Crown Prince was begging the permission of his father to let him "go in and smash the Allies—especially those English.

The "smashing" order was given—but not by the kaiser—and the would-be smasher has himself been smashed to smithereens and his right wing shattered.

And the reports comes that the Crown Prince is to be relieved of his command. Yes, he got into the smashing business all right, but not the kind he was hankering after.

### Chinook Breezes

The chicken season opens tomorrow (Friday), October 1st.

Thanksgiving, Day this year falls on Monday, October 11th.

Chinook is to get another new lumber yard next month

E. J. Scott of Oyen was in Chinook on Monday.

Several new pupils started at the Chinook school this week.

Mr. Wollard of Calgary has taken a position with J. R. Miller to help over the busy season.

Mrs. Blaney of Cereal was taken suddenly ill on Tuesday, and medical help was sent for from Chinook.

The last of the soldier farm help around here left Chinook the early part of this week, returning to Sarcee camp.

#### Ready for Business This Week

The new elevator is expected to be in a position to take in grain this week end or the first of next week.

#### Coming In Town To Live

Mr. C. R. Brownell is putting in a three-foot cement foundation on his lot on Third Avenue East, for a cottage 24x26, where he intends to reside when completed.

#### Grain Growers' Patriotic Acre

Twelve acres of grain have been donated to the Grain Growers' Patriotic Acre League by the farmers residing in Maunders, Fertility and Garden Plains districts.

#### A Busy Hub

Chinook presents a busy appearance these days, with the building of the new elevator, the new livery barn, and the erection of some three new dwelling houses, with several more new buildings to follow right along.

#### Thanksgiving Services Postponed

The proposed thanksgiving services and supper in connection with the Chinook Methodist church, which was intended to have been held on October 10th and 11th, have been unavoidably postponed to another date, notice of which will be given later.

#### Interior of Church to Be Finished

Work was started on Tuesday last on finishing the interior of the Chinook Methodist church. Messrs. Chesterfield and Moran have the work in hand. The walls are to be lathed and plastered off in white, and ceiled at the top, also inside porch built.

### Native Canadians and Recruiting

#### A Very Small Percentage Enlisting

ON several occasions during the present war the remark has been made, both in the press and otherwise, that a very small proportion of Canadian born recruits are enlisting for active service for their country, and such remarks have been indignantly refuted. But from the showing of the recent recruiting in Calgary, it certainly does look as though the native Canadian does not seem very much concerned about the war, at least, not enough to arouse sufficient patriotic enthusiasm in regard to joining the ranks, but instead seems content to leave it pretty well to those coming to Canada from the Old Country to defend this country and bear the brunt of the war for them.

We hear much, and we have read more, about the unexcelled bravery and the superb fighting qualities of the Canadian troops at front in the present war, but has it ever occurred to the Canadian born that the so-called "Canadian" troops are composed mostly of men from the Old Country, and that "Canada" gets the credit all the same.

The Calgary Herald cites a case in point, showing where the native Canadian stands in regards to the recruiting of Young Canada. Says the Herald:

"In the recent recruiting for the 82nd Battalion, gives out of a total of 183 enlistments, 94 were English, 27 Scotch, 14 Irish, a total of 135 Old Countrymen, while there were only 31 Canadians. There were even 7 Americans in the list. In other words there was one American to a little more than 4 Canadians."

Let every young Canadian read the above figures and then go to his own room and think about them, and not only think about them, but act upon them.

All honor to those brave native Canadians who have enlisted, and those who have been in the firing line, who have proved beyond a doubt that they are equal in every way to their fellow Canadians who came from the Old Country, in bravery, resources, and all that goes to make up some of the finest and best soldiers on the battle-field.

And that is what makes it all the more urgent why the native Canadian is wanted at the front.

Your own native land wants you, Kitchener wants you, the Empire wants you; freedom and all that you hold dear, demands you! Are you prepared to make the sacrifice, and join shoulder to shoulder with your fellow Canadian comrades in crushing for ever the world's worst enemy?

### Sedition Charges Stand Over

#### Crown Must Have Indictments Drawn Up Different

THE Fall session of the Supreme Court which has been held at Red Deer last week came to an abrupt end on Friday and was adjourned, with the sedition cases against John Reid of Edmonton, and others, being adjourned till the next sitting there.

The trouble arose when Mr. Russell, for the crown, had the charges against Reid made out stating that he had uttered seditious words at certain meetings. Mr. Jones, for the accused, objected, and Mr. Justice McCarthy ruled that the charge should be amended to state the exact words complained of.

The crown stated that this would entail a great deal of work, and as all the charges laid were similar they could not proceed at this court. Mr. Russell also took exception to his honor's ruling on the words of the charge.

A large number of farmers west of Red Deer had been held at city all week for these cases at great personal inconvenience and loss in some cases, and it was hoped that this session would see them tried.

The John Reid referred to above is the mouthy individual who lectured in Chinook some months ago.

### Chinook Breezes

Indian Summer weather.

Chinook is getting into the building habit.

W. Glessener intends going to Missouri shortly.

Butcher Lake is offering special prices to threshing outfits. See his advt.

Mr. M. Bowlen unloaded a threshing outfit here on Monday, sent to him by his brother.

Threshing is again in full swing after a delay of a few days, owing to the recent rains.

Farmers Chase and Henry are sometimes to be seen in town these days.

Machell—At Chinook, on the 17th inst., to Mr. and Mrs. Machell, a daughter.

Howton—At Chinook, on the 18th inst., to Mr. and Mrs. Harry Howton, a son.

The R. M. of Sounding Creek meets at Youngstown, Saturday, Oct. 2nd, at 10 a.m.

Dr. Rosenkrans intends to take a trip to Edmonton. That busy old body, Rumor, says there's some honeymoon in it.

The Women's Institute will meet in the Chinook schoolhouse on Saturday afternoon, October 2nd.

In another column will be found the particulars of a clearing sale of discs, wagons, and gang plows by Isadore Deman.

#### Getting Ready Xmas Gifts

The ladies of the Methodist church choir are planning a sale of work, when aprons, both fancy and useful, as well as other articles, will be sold. Those who like home-made things for Xmas gifts would do well to make a note of this. Sale will probably be about a month before Xmas.

### A NASY ACCIDENT

#### That Might Have Been Fatal

On Monday last, towards dusk, Clarence, the young son of P. Peterson, went out to drive a colt from a wheat stack, when the animal kick out one of its hind feet, the hoof striking the little fellow a hard blow on his scalp in front, inflicting a nasty gash four or five inches long, in a half circle, the shape of the hoof, requiring some stitches from Dr. Rosenkrans. The child is doing as well as can be expected. It was a very narrow escape, however, and might have proved very serious.

### Truman Dell

#### SMOTHERED TO DEATH

##### By Collapse of a Trap Door

Perhaps one of the most sudden and saddest deaths that has occurred in this district, was that which took place the first part of this week, when Truman Dell, who resided South of Cereal, lost his life by the collapse of a trap door. As far as we can ascertain at the time of going to press, it seems that the unfortunate man, with two others, was unloading wheat in a building belonging to his father that contained a cellar with a trap door. Truman was left by the two men to finish abovelling the grain in, while they went to put more grain into another building, Truman to follow when finished. But after waiting two hours and he did not show up they got alarmed and went back to see what had become of him. They saw one glove on the top of the grain, but Truman was nowhere to be seen. After scraping away some of the grain under the glove, they were horrified to see some fingers sticking out, and it was all too plain how poor Truman had lost his life, for on being gotten out life was found to be extinct, having been smothered to death. It would seem that the weight of the grain had bulged out the building at the bottom, tearing away the supports of the trap door on which Truman must have been standing at the time, the door giving way, the poor fellow going down with the grain and being quickly drawn into the opening thus made. There appeared to be some evidence that the deceased had made a desperate effort to save himself, as there had been two pieces of 2x4 laid across on the top of the trap door. Both of these were broken which accounts for the found glove being on the top of the grain and over one of the 2x4's. Never were there truer words, "In the midst of life we are in death."

### Purchases a Threshing Outfit

Mr. R. Clarke Fraser, accompanied by Mr. I. Deman, were in Saskatoon this week and purchased a new up-to-date Rumley threshing outfit complete. Mr. Fraser represented a syndicate, composed of himself and Messrs. Geo. Johnson, Butts, Wilkinson, and Vaughan. What they would have had to pay for their own threshing will pretty well square the bill.

## Fairs and Fakirs

Shown in England in the Old Days

Were the Fathers of Fakirs

The first great fair to be held annually in England was the Bartholomew Fair in London, which was founded in the middle of the thirteenth century and was finally abolished sixty years ago. This fair, held annually on St. Bartholomew's Day, the twenty-fourth of August, was the forerunner of all those cheap and gaudy amusement resorts which now flourish in America as well as England. The showmen of Bartholomew Fair were the fathers of fakirs. Originally started under religious auspices, and designed for the exchange of goods, Bartholomew Fair soon developed into a pleasure fair, featuring a variety of minstrels, jesters, performances by monkeys and other outlandish beasts, and wrestling matches were originally the amusement feature, but later the fair assumed the appearance of a cattle market. The period of the fair was extended to fourteen days. There were rows upon rows of cattle booths, with brilliant signs in front, depicting the wonders to be seen within, while "speakers" hoisted through megaphones just as they do at similar fairs today. Learned pigs and horses, giants, dwarfs, prodigious monsters with one head and two bodies, a child with three legs, a "gentle" marmalade, and scores of other freaks and wonders were exhibited, most of them being frauds of the most barefaced variety.

Minard's Liniment for sale every where.

Developing Hudson Bay Fisheries

Investigation as to the possibilities of developing a commercial fishery in Hudson Bay is under way by New foundland shipping interests.

Several ships of the fleet which have been engaged for exploratory work in the bay during the coming year, in connection with the Canadian government development work at Port Nelson, have been provided with equipment for careful examination of the fishing resources of the region.

Previous explorations have shown that there are large supplies of cod in those waters. In addition there are three species of salmon in Hudson straits, and in the summer these fish are plentiful on the coast of Baffin Island and the south shores of the bay.

"No, I didn't come up to business yesterday," said the stout man in the corner of the carriage. "The last of my daughters was getting married, so I had to give her away."

"Really? Who was the happy man, inquired a polite fellow passenger."

"I was," said the parent, emphatically.

Mrs. Homespun—"This paper says a wife in Formosa costs five dollars."

Mr. Homespun—"Well, a good wife is worth it."

## Where The Speed Comes From

The steel-lining is the secret of "Speed Shells" success. An exclusive feature of Remington-UMC.

## "NITRO CLUB" and "ARROW" SHELLS

It strengthens the head. Permits high compression. Prevents excessive expansion. Puts all the power into a straight, hard drive. Practically a gun within a gun. Try a box. Prove for yourself that "Speed Shells" get more birds.

## The Expert's Choice

is a Remington-UMC Repeating Shot Gun. Just handle this gun for a moment. Then you'll understand why only the Remington can satisfy the expert's needs.

Remington Arms - Union Metallic Cartridge Co. (Contractors to the British Imperial and Colonial Governments) WINDSOR, ONT. New York, U.S.A.

## ONTARIO VETERINARY COLLEGE

110 UNIVERSITY AVE. TORONTO, CANADA

Under the control of the Department of Agriculture of Ontario. Affiliated with the University of Toronto.

COLLEGE RE-OPENS FRIDAY, 15TH OCTOBER, 1915. CALENDAR "H" SENT ON APPLICATION.

E. A. GRANT, V.S., M.Sc., Principal.

## The Care of Firearms

Some Good Advice Given by an Old Marksman

"I am using a rifle that has been shot over 10,000 times, and it could be sold today as a new gun, because I have taken care of it, and never, under any circumstances, put it away soiled," says E. P. Thomas of Morrisburg, Ontario, writing on the subject of "Care of Firearms."

"When learning how to handle a gun, one should be cautioned by an experienced person. I burned my fingers in the barrel of a new rifle before I learned my lesson; therefore, I feel that when we have something good we should pass it along."

"Briefly, then, my experience tells me that first you should own a good standard gun. In shooting practice, use small objects to shoot at and train your nerves to be steady from the beginning."

"Acquire the habit of pressing (not pulling) the trigger and try to fire as soon as you have the proper aim. Always grip a gun of any kind firmly, but not too tightly. If the grip is too tight the tendency is to tremble. Don't hurry, be careful and deliberate. Do not expect to hit the mark every time. You cannot do it. Be patient, but optimistic. Try, try and then some more. Speed will come with practice."

"There is one thing the marksman must not overlook under any circumstances: the condition of the inside and outside of his gun. Never lay it away without carefully cleaning and oiling it outside and inside."

"Do not think that the .22 Remington is a toy for children to play with. In fact, it is built for serious work and is a mechanism of great accuracy. It will send the tiny .22 grain bullet a distance of 100 yards in less than half a second. By using the .22 long rifle cartridge, you can increase the distance to 200 yards and secure greater accuracy."

In conclusion, I can only say, do your part as a marksman, have faith in your gun and the results will not only please but astonish you."

Useful in Camp—Explorers, surveyors, prospectors and hunters will find Dr. Williams' Pink Pills of great use in camp. When the feet and legs are wet and cold it is well to rub them with the oil and the result will be the prevention of pains in the muscles, and should a cut, or contusion, or sprain be sustained, nothing could be better as a dressing or ointment.

Krupps' Great Safe

Krupps are credited by the American consul at St. Lawrence with having just turned out a safe which will baffle even scientists to open. In order to make a large safe, one must use a large amount of steel. The Krupps' Great Safe is made of oxygen and .278 gallons of acetylene would be needed. It is believed that this safe has been specially constructed for the Kaiser as a haven of refuge for him when the final crash comes.

"Madam," said a doctor one day to the mother of a sweet, healthy babe, "the ladies have deputed me to inquire what you do to have such a happy, uniformly good child and baby."

The mother mused for a moment for the strangeness of the question, and then replied simply and beautifully:

"Why, God has given me a healthy child, and I let it alone."

McClavis was accused of having hit the whiskey in his possession. A reluctant witness admitted that he knew of a suspicious barrel going to the house.

"Now," said the prosecuting counsel, "remember you are on oath."

"Well," replied the witness, "there was McClavis' marked on a end of the barrel, and 'whiskey' on the other, but, being on oath, your honor, I couldn't say whether it was whiskey or McClavis' was in the barrel."

McClavis was accused of having hit the whiskey in his possession. A reluctant witness admitted that he knew of a suspicious barrel going to the house.

## A Small Farm Tractor

A New Machine That May Revolutionize Agriculture

Certain manufacturing companies are said to be perfecting low-priced, light weight gasoline tractors suitable for medium-sized farms.

These engines will do the work of about four horses, and could pull a plow in a nine-inch furrow at two and one half miles an hour. They are being subjected to very severe tests—such as breaking up new land, pulling twenty-four inch harrows weighted to cut the ground about four inches, and hauling waggons loaded up to four tons, at the rate of ten miles an hour. The tractors are so easily handled that they will draw multiple cultivators all four miles an hour through young corn.

In building these machines great weight, which up till the present time, it was thought to be absolutely necessary, has been as far as possible eliminated. It is traction that counts. The price of the engines will be within practically every farmer's reach. Indeed, it will display horses almost entirely, as the machine will do nearly all kinds of horse labor, while at the same time it is much cheaper. There is no cost except what is low, about \$250.

If this tractor proves anything like the success that reports of it lead us to believe, it will revolutionize agriculture, to a far greater extent than any invention has done so far. With a gasoline horse to plow, harrow, and harvest his crops, motors and trucks to use on the road, engines to pump the water, saw the wood, run the threshing, grain separator and dynamo, and with electric lights, telephone and rural mail, the farmer can no longer complain of the hardships or isolation of his life in the country.

## THE ONLY CURE FOR A WEAK STOMACH

## Indigestion and Similar Troubles Must Be Treated Through the Blood

Indigestion can be treated in many ways, but it will only be cured in a way—through the blood. Purgatives cannot cure indigestion. By main force they move the food still half digested. That weakens the whole system, uses up the natural juices and leaves the stomach and bowels parched and sore. It is actually a cause of indigestion—not a cure. Others try medicine, but that does not digest the food for the stomach really weakens it, and makes the trouble worse. The digestive organs can never do the work properly until they are strong enough to take the food as it is. The new, rich, red blood so abundantly supplied by Dr. Williams' Pink Pills, is the reason for the success of this medicine is plain. Nothing can stimulate the glands and nothing can absorb the nourishment from the food but pure red blood. And Dr. Williams' Pink Pills supply it. The medicines in giving that new, rich blood, Miss B. E. Johnson, Hemlock, N.S., says: "My stomach was a failure from indigestion. I could eat of any kind was distasteful to me, and after eating I would sweat much. Naturally I grew weak and had little shadow of my former self. It was taking a doctor's prescription, but it did not help me in the least. Then I read of a case similar to my own cured through the use of Dr. Williams' Pink Pills and I decided to try it. I took six boxes. By the time I had taken six boxes the trouble had entirely disappeared, and I could eat heartily of all kinds of food. More than this I found my general health greatly improved through the use of the Pills. I can therefore strongly recommend Dr. Williams' Pink Pills as a cure for indigestion."

You can get these Pills through your dealer in medicine or by mail, post paid, at 25 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

## "Un-American"

Who will say that there is not absolute justice and the highest morality in a practice that permits Belgium and France and those who are fighting their battles to purchase munitions where they may? Certainly an American who understands the principles of liberty and freedom for which his country stands and has stood. The cry for an embargo upon export of munitions from this country contains not a shred of Americanism. It is not only un-American but anti-American. It is simply and solely of Germany, by Germany, for Germany. And just as it is essentially pro-German and anti-American, so it is inherently and absolutely immoral—New York Herald.

"Certain morbid conditions must exist in the stomach and intestines to encourage worms, and they exist as long as these morbid conditions permit them to. To be rid of them and spare the child suffering, use Miller's Worm Powders. They will correct the digestive irregularities by destroying the worms, conditions favorable to worms will disappear, and the child will have no more suffering from that cause."

In view of Lord Michelham's offer of a thousand pounds to any British aviator who should succeed in crossing the English Channel, the Journal of Paris, asked him whether "French aircraft" should be allowed to share in these magnificent prizes.

"Of course," replied Lord Michelham, "I never thought of making a distinction between your brave air men and ours."

## The War and the Empire

The war, by which our empires in their ignorance hoped to dissolve the union, has fortunately strengthened this faith and accelerated this progress. Never have the sister nations felt so near to each other as in this hour of their common trial. Never have they seen so clearly how all that each has dearest depends and correlates united efforts now and their closer union hereafter.—London Times.

## MOONEY'S BISCUITS ARE THINNER

That makes them neater, crisper, daintier, more appetizing.

The one biscuit good enough to take the place of your own baking.

Fresh as the biscuits from your own oven.

Think what that means! Freedom from a broiling kitchen—leisure on the porch or in the parlor. Time to do the little knick-knacks that have been neglected.

They are baked in the big sanitary factory in Winnipeg—right at your very door.

Use MOONEY'S and be sure of a biscuit that is absolutely fresh; a biscuit that will satisfy the family.

In tempting packages or sealed tins as you prefer.

"LET MOONEY DO IT"

Mooney's Biscuits are the creamiest, crispest crackers made.

That makes them neater, crisper, daintier, more appetizing. The one biscuit good enough to take the place of your own baking. Fresh as the biscuits from your own oven. Think what that means! Freedom from a broiling kitchen—leisure on the porch or in the parlor. Time to do the little knick-knacks that have been neglected.

# TWELVE MONTHS WAR IN EASTERN THEATER

Photos by American Press Association.

1.—General von Buelow, a German commander in the east. 2.—Grand Duke Nicholas Nikolaievich, commander in chief of the Russian armies. 3.—View of Warsaw from Praga. 4.—General von Hindenburg, another German commander in the east. 5.—Type of newest Austrian siege gun which did much damage in the Tauton advance. 6.—Archduke Frederick, commander in chief of the Austrian armies. 7.—General von Mackensen, German leader, fighting near Warsaw.

ON AUG. 25, 1914, the Austrian troops marched from Krasnik, Poland, toward Radom, and on the following day the Russians reached a point twenty-six miles from Danzig, with the main Russian army 140 miles from Berlin. Thus, just a year ago, the campaign which has been termed the greatest in the history of the world began. Back and forth the two great armies swayed, with advantage first on one side and then on the other. The fighting was horrible, the loss of life on both sides appalling, and for ten months neither side could gain a decisive advantage. True, the Russians had advanced, taking Przemysl, in Austrian territory, after a long siege, only to be driven back first to Lemberg, then to Warsaw, and then still farther in their own territory.

The Tauton armies would not be stopped. Germany and Austria put every force on earth into their terrific attacks, and the czar's men, facing a shortage of ammunition, fell back inch by inch until now the Austro-German forces have penetrated far into Russian Poland.

## Greatest Campaign in History.

The occupation of Warsaw by the German army ends the greatest campaign of the war of all wars, of all history. It has been fought along a front of

1,000 miles, extending from the Baltic to the frontier of Roumania. According to the most authoritative figures, there have been between 5,000,000 and 7,000,000 men engaged in almost daily conflicts. The attacks upon the sides of the inclosing lines—500 miles—of Warsaw have been the most furious in modern warfare and only equaled by the vain counterattacks which have been more or less successfully launched by the Russians.

Hope was first entertained in military quarters in London and Paris that the Russians had some tremendous coup in reserve, that they would stand a siege in their principal fortresses along the Warsaw salient, and then, with a free army still in the field, would attempt to turn the Teutonic flank, either in the north between Libau and Riga or in the south on the Bukowina-Roumanian frontier or suddenly in the south on the Warsaw salient and southeast of Warsaw and attempt to envelop the armies in the west.

But then came advice from Petrograd that in order to save the Russian armies a retreat—the greatest in history, even greater than the retreat of the Russians through Galicia from April 28 to May 25—must be made and the fortress of the Warsaw salient abandoned. It was the same old story of the Galician retreat—lack of ammunition. The armies would retire to prepared and selected ground, forming a similar angle, 130 miles east of the Warsaw salient, and there await on the defensive the munitions necessary for a new and formidable offensive.

## German Plan to Reach Railways.

Notwithstanding the feints in the north, in the direction of Riga, the aim of the German general staff has been obvious since the beginning of June. It was to reach the railways on which the Russian armies of the salient depended for their supplies and by which they might make their retreat. To do this seven huge armies have been employed—the German northern

army operating against the double track line which runs from Warsaw to Petrograd, 100 miles in the northeast, via Bialystok and Grodno; the army operating in the Suwalki district, threatening the same line farther west; the army fighting as a support of the latter on the Narew; the army directly aimed at Warsaw, north of the Vistula; the army directly aimed at Warsaw, south of the Vistula; ten or twelve Austrian army corps, attempting to reach the single and double track railway from Ivangeord to Brest Litovsk and Moscow, and the line from Warsaw to Kiev via Lublin and Chelm, which is for the most part a single track, and, finally, the army of Von Linde, made up of Austria's "new" army of 700,000 or 800,000 men, operating on the Lipa, east of Lemberg.

Five months, in spite of the terrible attacks made upon the Warsaw-Bialystok section in the north and the Lublin-Chelm section in the south, the

Russians managed to keep the outer lines free, while between them the double track line from Warsaw via Siedlce to central Russia remained open until the last.

North of the Vistula the combined operations have been under the supreme command of Field Marshal von Hindenburg, while the Austro-German—principally Austrian—armies of the south or right have been under the supreme direction of Field Marshal von Mackensen.

At the very beginning of the campaign the hardest fighting developed between the middle Vistula and the Bug, where the Russians held their ground for nearly two months, suffering no small loss. Another battle front early developed was north of the lower Vistula, from Wyszogrod to around Osovets.

## Russian Plan That Failed.

This upshot of the two months' campaign of the Teutonic armies has been the logical military sequel to the defeat of April for penetrating and grasping the plains of Hungary in the form of a gigantic pair of shears, one knife of which was to cut southward from the Carpathians and the other northward from Bukovina and Transylvania.

In the last week in April Russia was in possession of the crests of the Carpathians, and her left wing had already begun to move westward through Bukovina, when the vast German-Austrian masses (including 700,000 or 800,000 Austrian reserves, made up of exceptionally intelligent men between the ages of thirty-five and forty, who had for months been carefully trained in order to replace the Fourteenth and Third army corps on the Italian frontier), which had been mobilized in Silesia, southeast Prussia and in Galicia west of Cracow, began their drive eastward, the Russian lines retreating from their positions on the Carpathians.

When the retreating Russians left in a northerly direction the Polish-Galician frontier, forty miles east of Zamosc, in Poland, the campaign proper for the possession of Warsaw began. The entire Russian front then represented a huge angle, the sides of which, in irregular lines, extended from the Baltic, just east of Libau, to Plock, forty miles west and a little north of Warsaw, and thence in a southeasterly direction through a corner of Bukovina to the frontier of Roumania—in all a distance of over 1,000 miles.

Although some attempt was made to turn the northern line on its right flank and push the southern line still farther away from the Galician frontier, the preponderance of the Teutonic armies has been employed nearer the vortex at Plock—that is to say, on a line about 300 miles long extending northeast of Warsaw and on one of about the same length extending south-east from their point of junction at Plock.

## The Vital Railway Systems.

Between the sides of this angle lines of railway radiate from Warsaw—northeast, east and southeast. A similar system is found at the fortress of Brest Litovsk, on the Bug river, 130 miles due east of Warsaw, while farther east still on the line to Petrograd a vast network of strategic railways has been constructed since the war began connecting the manufacturing towns whose products have sustained the armies at the front. At Brest Litovsk there may be found, opening eastward and embracing these towns an angle similar to that which in the last week in July contained Warsaw and similarly punctuated along its sides by fortified towns and strategic heights, some of which date only from June.

## AERIAL TORPEDO DEvised BY FISKE; FIRST MEETING OF NAVAL BOARD SOON

Photos by American Press Association.

Air-craft from which it is proposed to fire torpedoes. A Whitehead torpedo, similar in appearance to the new one, and (below) Admiral Fiske.

THE first great gathering in the United States to consider the national defense question will be held in Washington from Oct. 4 to 7. It will take place immediately following the Grand Army of the Republic "re-anniversary" there and will be under the auspices of the National Defense League.

It is planned that the gathering shall be one of representative citizens from every state of the Union, who will consider what measures must be taken by

Congress to increase the fighting arm of the country.

The conference will be presided over by Representative Kahn of California, chairman, and Senator Robert F. Broussard of Louisiana, vice chairman of the National Defense League.

An invention which was perfected by Rear Admiral Fiske almost twenty years ago, when he was a lieutenant commander in the navy, is being considered by naval designers as a possible basis for the construction of aerial torpedo boats which might inflict tremendous damage on battleships.

The Fiske invention provides for the construction of a flying vessel, which would carry a torpedo weighing one ton. One of the principal values of such a flying machine, in the opinion of naval experts, would be its ability to attack landlocked fleets.

Senger into the water just as it would have been launched from a destroyer. The impact sets the torpedo's machinery in motion, and it is off at a speed of more than forty knots an hour toward the enemy ship.

The range of the newest navy torpedoes is 10,000 yards, and even the older types will be effective at 2,000 yards. Carried on a huge aeroplane the 2,000 pound weapon would be taken over farther defenses at an altitude safe from gunfire. Once over the bay, the machine would guide to within ten or twenty feet of the water, the torpedo riders would be set, and it would be dropped, to do its work while the aeroplane rose and sped away.

Aeroplane to carry a ton of dead weight have been perfected by several countries. Russia is said to have several that will carry twenty tons, and the new British air craft probably will have similar capacity.

It is said to be possible that a type of radio controlled torpedo might be employed, one aeroplane carrying a torpedo and another the wireless machinery to control the missile's flight through the water. It is pointed out that Admiral Fiske observed patents on such a method of control in 1900, when he was a lieutenant commander in the navy. The secret was to be broad and far-reaching as to underlie all subsequent developments of radio controlled devices.

"My invention," says the application filed by Lieutenant Commander Fiske, is especially applicable to automobile torpedoes and makes it possible to control the movements of a torpedo with great certainty from a shore, from the deck of a ship or a lake."

Since the aerial torpedo plan was advanced reports have come that German engineers were at work on a similar scheme. It is planned to drop from aeroplanes a torpedo that can be guided by radio impulses during its fall and send it with absolute certainty to its mark.

Further tests of the Isham high explosive fuse for use in navy shells will be made soon by the naval board appointed eight months ago to determine the value of this device submitted by Willard S. Isham. The fuse was a subject of controversy during its fall and congress, and the special board, headed by Rear Admiral Fiske, was appointed to conduct the tests. The secret was to be broad and far-reaching as to underlie all subsequent developments of radio controlled devices.

Only fifty-seven miles separate the German army on the western frontier guns of the allies, it might be possi-

## Plundering Belgium

## The British Fleet

Germany discounted a long war. There was no calculation upon her part of a war that would last for months and possibly for years. The German military staff believed in their ability to force an early and successful conclusion to a war in Europe.

Those of us who may be accustomed to thinking of German thoroughness and leaving our own national traits to occupy a position to the rear will do well to remember that it was upon her naval arm that Britain placed all her trust, and that arm has answered to every national anticipation.

### Scope of the Red Cross

### No "Smoke of Battle"

**Using Washing Soda**  
Washing soda is a strong alkali and must be used cautiously as a cleanser. Used in cleaning cooking utensils while it "eats" the grease and the scorch, it also eats the metals of which the pots are made. When a woman carelessly throws a "handful of soda" into a pot, or "lets it soak," she is soaking the scorch and the metal, too. That is one reason many pans chip or "wear out" easily. Washing soda is better employed in cleaning the sink and waste pipes.

sertion.

Changes of advertisement must reach the office  
not later than Tuesday.

A. NICHOLSON,  
Editor and Proprietor

## IT PAYS TO ADVERTISE

Does it pay to advertise? Well  
we should say it does pay to ad-  
vertise. Last week a Hopeville  
merchant advertised fresh dairy  
butter for sale. The compositor  
carelessly substituted an "h" for  
a "d" and the ad read: "Fresh  
Hairy Butter for Sale." A smart  
barber called up the grocer and  
offered to shave the butter at re-  
duced rates, as he said business  
was dull. The grocer got mad  
and licked the stuffing out of the  
barber, breaking his nose and  
otherwise maiming him, so he  
was obliged to call the doctor,  
who charged ten bucks for his  
services. The next day the bar-  
ber met the editor on the street,  
and heaved a brick at him, giving  
him a close shave. In his efforts  
to break away the editor fell  
down, tearing his breeches on the  
southern side so badly that he  
had to buy a new pair. The  
editor's shears, which were in his  
hip pocket, penetrated a tender  
part of his anatomy, so he had to  
call in a surgeon. And all the  
result of one little ad. It pays  
to advertise, you bet!

An ad in the Advance, the  
great family journal, does the  
trick!

DR. LACKNER, DENTIST,  
will be at Chinook the 10th, 11th  
and 12th of every month; and  
Youngstown on 15th to end of  
month.

Another interesting letter from  
the front will appear in next  
week's issue of the Advance.

Several loads of wheat were  
brought to the elevator the early  
part of this week, but had to be  
taken back again on account of  
being too wet, being threshed too  
soon after the recent rain.

## FARMERS!

I have a disc sharpener. Save  
your horse flesh by having your  
discs sharpened. I have also a  
few plough shares of different  
makes, which I am clearing out  
at cost. Come in and see if there  
is anything to fit your plough.

R. C. CHURCH: Rev. Fr. W. R.  
Dargen will say mass the first  
Friday in each month in I.O.O.F.  
hall, at 9 o'clock a.m.

## SYNOPSIS OF CANADIAN NORTH- WEST LAND REGULATIONS

THE sole head of a family, or any male over 18  
years old, may homestead a quarter section  
of available Dominion land in Manitoba,  
Saskatchewan or Alberta. Applicant must appear  
in person at the Dominion Lands Agency or  
Sub-Agency for the District. Entry by proxy may  
be made at any Dominion Land Agency (not  
Sub-Agency), on certain conditions.

Duties—Six months' residence upon and culti-  
vation of the land in each of three years. A home-  
steader may live within nine miles of his homestead  
on a farm of at least 80 acres, on certain conditions.  
A habitable house is required, except where resi-  
dence is performed in the vicinity.

In certain districts a homesteader in good standing  
may pre-empt a quarter-section alongside his home-  
stead. Price \$2.00 per acre.

Duties—Six months' residence in each of six years  
after earning homestead patent; also 50 acres extra  
cultivation. Pre-emption patent may be obtained as  
soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead  
right may take a purchased homestead in certain  
districts. Price \$2.00 per acre. Duties—Must reside  
six months in each of three years, cultivate 50 acres  
and erect a house worth \$250.00.

The area of cultivation is subject to reduction in  
case of rough, scrubby or stony land. Live stock  
may be substituted for cultivation under certain con-  
ditions.

W. W. CORY, C.M.G.  
Deputy of the Minister of the Interior  
N.B.—Unauthorized publication of this advertisement  
will not be paid for.—64288
